

## Project Announcement

# Jamestown Lower Main Street Bridge Replacement Project Set to Start early June 2018

*The Town of Jamestown, with contractor SEMA Construction, is ready to start the Lower Main Street Bridge Replacement project*

## Project Overview

On Monday, June 4, the Town of Jamestown, with contractor SEMA Construction, will begin the Lower Main Street Bridge Replacement project. The goal of this project is to improve the capacity of the Lower Main St. crossing of James Creek by replacing the existing Lower Main St. bridge with a wider and higher bridge.

Work includes removing the existing bridge and constructing a new one; detour installation; paving and striping operations.

SEMA Construction is the lead contractor for this \$1.06 million project. Work is expected to be completed in late September 2018.

## Pedestrian and Traffic Impacts

Starting Monday, June 11, crews will work on the project site, from **7 a.m. to 5 P p.m.; Monday through Friday.**

Pedestrian and motorized vehicle access to the bridge will be closed, with a detour in place from CR 94 to Lower Main Street until early September. The Lower Main Street detour will be one lane, with stop signs in both directions. The speed limit will be reduced to 10 MPH and parking will not be permitted on Lower Main St. near the bridge during working hours.

As the detour is one lane, please use extra caution when entering and exiting the detour, and please be patient as occasional short delays may occur during the course of construction.

This project is weather-dependent, and the schedule may be altered, including extended working hours up to 7 p.m.

## Contact Information

To keep you informed of the project progress and upcoming activities, we'll provide weekly updates via email. If you would like to be added to our distribution list, or if you have any question or comment, please contact us at the phone number or email address below:
